amy_varela@ci.pomona.ca.us

(Parking is available in City Hall & library parking lot-2 hour limit is void)

Have you ever wondered what a File Geodatabase is and why would you use one? Can you explain the difference between a Geographic Coordinate System and a Projected Coordinate system? Well look no further than the City of Pomona GIS training. Topics covered in the training will include toolbar customization, connecting to and using GIS resources on the Web, Understanding the field calculator, Building complex labels using VBScript, adding X and Y coordinates to your map as a shapefile, keyboard shortcuts and many more. Demonstrations and handouts will provide you with the tools necessary to take your crime analysis GIS to the next level.

Peter King is the Senior GIS analyst for the City of Pomona providing GIS services and products to the city for nearly 3 years. Peter earned his degree in geography from California State University Fullerton with an emphasis in GIS and remote sensing. Before working at the City of Pomona, Peter was involved in utility GIS data conversion for a prominent engineering firm in Orange County who provided GIS services to many of the largest municipalities in Southern California. Peter has been a speaker and presenter at geography and GIS conferences throughout Southern California.
